The mission of GUT

education for the needs of dynamic development of the economy and society based on knowledge and scientific research at the highest international level in a globalized world, in order to participate in the transformation of civilization and enrich the culture of the country, particularly in the areas of science and technology

Courtyard in the Main Building

Foucault Pendulum

Our Goal

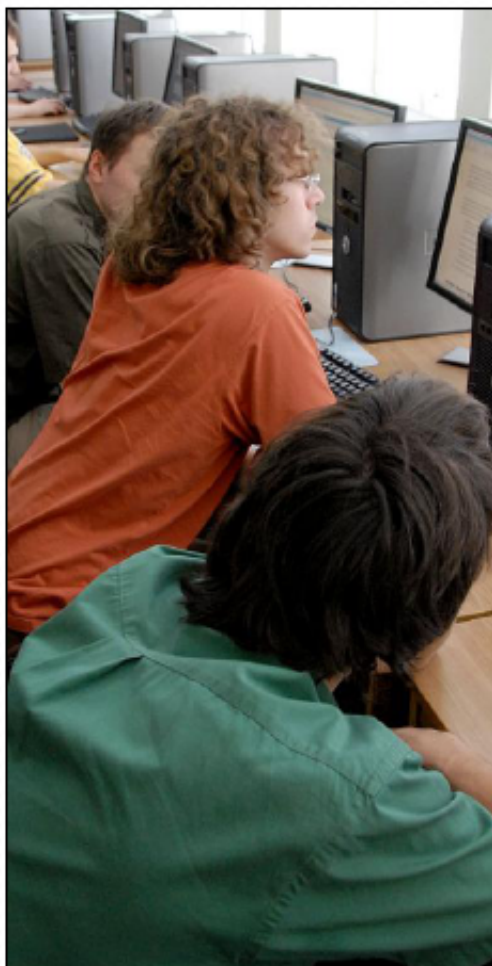

striving to be a modern university of technology, a reputable and renowned centre, as well as the initiator and executor of many innovative projects and tasks

Gdansk University of Technology should meet the demands of competition and take advantage of development opportunities available on the global market

it should function smoothly and efficiently to realize our goals consistently in correlation with the ambitions of the scientific staff and the best aspirations of students
