*Is it a conference or something better?
Please join us!*

Nano and Advanced Materials Workshop and Fair NAMF 2013

The conference is dedicated to:

- **Industry** that wants to improve their products and market position by using nanotechnology and advanced materials
- **Research** groups in Academia and Industry that want their technologies to be applied
- **Investors** who are interested in finding researchers who have high potential research results to show

Why attend:

- To increase interest from industry to improve their products by means of high technology
- To increase awareness that high-tech is a tangible way out of the crisis
- Materials are the critical limit for product improvement
- Nanotechnology and nanomaterials offer opportunities for innovation and enhanced quality and properties of products
- Regulatory issues have to be addressed to pave the way towards economic success of high technology

What is special about this event?

- International networking event
- Focus on technologies that are as close to the market as possible (this will be a key selection criterion on the offer side)
- For the topics of biggest interest, experts will provide background lectures
- Investors and experts in technology transfer will provide advice, especially on how to give the “right research answers” to potential investors
