

## **Dr Artur Kowalik**

Obtained his master degree in biochemistry of histone proteins at the Pedagogical Academy, Kielce, Poland. Next he obtained PhD in breast cancer molecular biology at the Maria Sklodowska-Curie Memorial Cancer Center and Institute of Oncology, Warsaw, Poland.

His area of expertise is cancer diagnostic. He established and organized Department of Molecular Diagnostics in the Holycross Cancer Center (HCC). The Department integrates educational and research activities and provides high-quality diagnostic services performing molecular biology tests (including NGS technology) for cancer patients treated in HCC. Scientific interest also includes introduction of nanotechnologies and lab-on-chip technologies for diagnosis and cancer treatment.
